About Me

I am **K. Tejomai**, an aspiring software developer interested in programming, data analysis, automation, and problem-solving.

I have learned **C, Python, Data Structures & Algorithms, Power BI, and n8n** and have worked on projects involving workflow automation.

I enjoy learning new technologies and building practical projects that solve real-world problems.

Technical Skills & Tools

C

Python

Data Structures & Algorithms

Power BI

n8n

Git

GitHub

Courses & Learning

- C Programming
- Python Programming
- Data Structures & Algorithms
- Power BI
- n8n Workflow Automation

Projects

n8n Automation Projects

- Built workflow automation projects using **n8n**.
- Created automated workflows to connect different applications and services.
- Worked with triggers, actions, APIs, and data processing.
- Designed workflows to reduce repetitive manual tasks.

Power BI Projects

- Created dashboards and data visualizations using **Power BI**.
- Analyzed data and presented useful insights through interactive reports.

Python Projects

- Developed Python programs to practice programming and problem-solving.
- Used Python concepts such as functions, loops, data structures, and algorithms.

C Programming Projects

- Practiced C programming fundamentals and problem-solving.

- Implemented programs using basic data structures and algorithms.

Career Objective

To begin my career in the technology field where I can use my skills in **programming, data analytics, and workflow automation** while continuing to learn and contribute to real-world projects.

Currently Learning

- Python
- Data Structures & Algorithms
- Power BI
- n8n Automation
- APIs & Workflow Integration
- Git & GitHub
